## Memories from nothing EMANUELE TOZZOLI

Born in Italy in 1989, Emanuele discovers painting in the very first years of age together with his father, an artist who has been painting for over 40 years. At the age of seven, he created his first small sculptures by assembling objects and painted his first informal abstracts, discovering a side of creative and fascinating art.

Deeply attracted by the most intimate nature of artistic research, in the following years he extended his studies to the field of music, forming adolescence as a sound engineer. In the following he worked as a restorer of wall paintings. In these years of learning and work he refines his manual skills, learns the peculiarities of color and probes the depths of the composition.

Emanuele elaborates a unique working method that summarizes all the experiences gained in the artistic and working field. In his paintings he uses an instinctive and visceral workflow, through which he creates a deep connection between his inner part and the present moment.

He lives his art as a deep path of openness and knowledge, in which each painting becomes the materialization of an introspective, dreamlike and extravagant world. He uses a recurring symbology characteristic of his style that recalls the original forms of childhood.
